DETAILED ACTION

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance.

Referring to the independent claim, the prior art of record fails to anticipate or render obvious "automatically displaying said embedded real-time data with said television program listings in response to a user request to view all listings", as recited in the claim. It should first be noted that the Examiner is interpreting "real-time data" to mean dynamically updated data as supported/taught in the Applicants' specification of the present application (page 19, lines 13 - 23). The prior art of record, Knee U.S. Patent No. 5,589,892, teaches embedded real time data i.e., sport scores, with television program listings. However, it only shows said real-time data for categorically selected sports programs wherein the display does not show "All Listings". Not only does it not teach the limitation above, it teaches away because it reads on a completely different embodiment of the parent case that deals with categorized display of programs in an internet television program guide (parent case U.S. Patent No. 6,268,849—column 10, line 65 - column 11, line 29 and specifically figure 13).

A Goodman type obviousness double patenting rejection cannot be made because the claim of the instant application is narrower and patentably distinct from the claims of the parent case U.S. Patent No. 6,268,849.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
